

Replication:

Ensure the Metrics_Baseline.csv file is in same directory as everything else.

After successfully running the ise.py file (look at manual.pdf) then open metrics_test.py.

Ensuring everything (libraries, generated csv files, csv dataset files, py scripts) are all in the same directory and then run metrics_test.py.

avg_metrics_Baseline.csv , avg_metrics_SGD and results_stats_test.csv are the generated results files.
