

Requirements

Required Libraries:

pandas
numpy
scikit-learn
re
Nltk

Please Ensure you have a local download version of nltk stop words <https://www.nltk.org/data.html>

Ensure all the 5 project csvs are downloaded (they are not in the repository as they are too big):

incubator-mxnet.csv
caffe.csv
keras.csv
Metrics_Baseline.csv
pytorch.csv
tensorflow.csv

And then change line 13 of 'ISE.py' to point to your path of stop words as it did not work by using the api call. As seen below.

```
13      nltk.data.path.append("/Users/jas/nltk_data") #h
```
